I want to add two textfields (latitude and longitude) to my iPhone App. I was able to get these by tapping the location and get the latitude and longitude via -(NSString *) coordinateValue[NSLog(@"coordinate value: %f", self.coordinate.longitude); return @"lat: %f, lon: %f";] The problem is that I dont want the user to tap the location again and again to get the values, I want the values to come directly from the current location of the iPhone. Is there any way I can get the values? A: For me, this does not work on iPhone 3G. (Just as the call NSString *location = [self coordinateValue] returns nil if the location is not available. Then I noticed that I can call "getAuthorizationStatus" on location services, which returns kCLLocationAuthorizationStatusAuthorized on iPhone 3G but kCLLocationAuthorizationStatusNotDetermined on iPhone 3GS and 4. I'm not sure, it cannot be assumed that all of the property on the shopping center property is subject to the lien.[6] Thus, in addition to the first two requirements, under the third requirement for a contractor's lien, the plaintiff must have rendered the services or furnished the materials in accordance with "a contract with the owner or the owner's authorized representative." Brown v. Raleigh Co., 176 N.C. 382, 387, 97 S.E. 333, 336 (1918). In this case, plaintiff met neither of the three requirements for a contractor's lien because it did 82157476af
